

iGaming Autonomous Player Support: Category Classification & Taxonomy Guide

Executive Overview

In modern iGaming customer operations, autonomous support agents (such as Cevro AI) must dynamically interpret player intent across multiple functional domains. Unlike generic chatbots, iGaming agents process sensitive player data, handle live transactional logic, enforce strict jurisdictional compliance, and protect player trust.

This document outlines the **6 Core Operational Categories** of player inquiries, detailed with concrete player interaction examples, operational triggers, and resolution objectives.

1. Financial & Transactional Operations

Financial queries represent **35–40% of overall support volume**. Because real money is involved, these interactions carry high emotional urgency and require instantaneous data reconciliation between the Player Account Management (PAM) platform and payment gateways.

Detailed Operational Sub-Categories & Examples

A. Withdrawal Tracking & Delays

- **Player Quote:** *"I requested a \$1,200 withdrawal to my Visa card 3 days ago, but it's still showing as 'Pending'. Why haven't I received my cash?"*
- **Player Quote:** *"My \$450 payout was canceled and pushed back into my casino account. I didn't ask for a cancellation!"*
- **Player Quote:** *"What is the daily bank transfer withdrawal limit for my account level?"*
- **Underlying Context:** Interbank clearing delays, manual risk review holds above financial thresholds, or expired payout session tokens.

B. Deposit Failures & Uncredited Funds

- **Player Quote:** *"My bank account shows \$150 was debited by your site, but my casino wallet balance still says \$0.00!"*
- **Player Quote:** *"My credit card keeps getting declined with error code **ERR-3012**. Is there something wrong with your payment page?"*

- **Player Quote:** *"I sent 0.05 BTC to my deposit address 45 minutes ago. How many network confirmations do you require before crediting my balance?"*
- **Underlying Context:** Payment Service Provider (PSP) webhook drops, bank-side anti-gambling blocks, or crypto mempool congestion.

C. Payment Method & Currency Rules

- **Player Quote:** *"I deposited using my MasterCard, but the system won't let me select MasterCard to withdraw. Why?"*
- **Player Quote:** *"Can I link my spouse's PayPal account to deposit money into my account?"*
- **Player Quote:** *"Why was I charged a 2.5% foreign exchange fee when I deposited in CAD?"*
- **Underlying Context:** Anti-Money Laundering (AML) closed-loop payment enforcement (withdrawing to the same payment instrument used for deposit) and third-party payment prohibition rules.

2. Account Verification & KYC / AML Compliance

Identity verification is the primary friction point during a player's onboarding and cash-out journeys. Clear, transparent communication prevents player churn while preserving regulatory compliance.

Detailed Operational Sub-Categories & Examples

A. Document Status & Rejection Guidance

- **Player Quote:** *"I submitted my driver's license yesterday, but my account still says 'Unverified'. How much longer is this going to take?"*
- **Player Quote:** *"My utility bill was rejected because it didn't show my full name. Can I submit a PDF of my internet bill instead?"*
- **Player Quote:** *"Why are the corners of my photo ID cut off in your upload portal?"*
- **Underlying Context:** Automated OCR/KYC engine failures due to glare, expired documents, address mismatch against public databases, or cropped images.

B. Enhanced Due Diligence & Source of Funds (SoF)

- **Player Quote:** *"You locked my account and are asking for my bank statements and paystips. Why do you need my private financial records just for me to play?"*
- **Player Quote:** *"I'm self-employed—what documents do I need to send to clear the Source of Funds check?"*
- **Underlying Context:** Regulatory triggers reached (e.g., cumulative deposit thresholds within 30 days) requiring risk and compliance verification.

C. Profile & Identity Data Corrections

- **Player Quote:** *"I moved to a new address last week. How do I update my registered address so I can pass verification?"*
- **Player Quote:** *"I accidentally misspelled my surname when signing up. How can I correct it to match my passport?"*
- **Underlying Context:** Security measures preventing unauthorized identity changes on active real-money accounts.

3. Bonuses, Promotions & VIP Loyalty

Promotional inquiries often stem from complex bonus mechanics, playthrough mathematics, or game eligibility terms.

Detailed Operational Sub-Categories & Examples

A. Missing & Uncredited Promotions

- **Player Quote:** *"I deposited \$100 using code **WELCOME100**, but I only got my cash deposit and no bonus money!"*
- **Player Quote:** *"Where are my 50 free spins for the Friday promotion? The banner said they would be credited automatically."*
- **Player Quote:** *"I opted into the cashback campaign on Monday, but my balance wasn't credited this morning."*
- **Underlying Context:** Missing promo codes at checkout, minimum deposit threshold non-compliance, or batch cron-job distribution delays.

B. Wagering / Playthrough Calculations

- **Player Quote:** *"Why can't I withdraw my winnings? It says I still have \$320 left in rollover."*
- **Player Quote:** *"I spent \$200 playing Blackjack—why did my bonus wagering requirement only go down by \$20?"*
- **Player Quote:** *"When does my active bonus expire, and what happens to my bonus balance if I forfeit it?"*
- **Underlying Context:** Game weighting factors (e.g., Slots count 100%, Live Blackjack counts 10% toward wagering requirements) and expiry deadlines.

C. VIP Tiers & Loyalty Perks

- **Player Quote:** *"How many loyalty points do I need to reach Platinum VIP status?"*
- **Player Quote:** *"Can I exchange my 5,000 reward points for cash instead of bonus credits?"*
- **Player Quote:** *"I'm a high roller at another casino. Can you match my VIP status here?"*
- **Underlying Context:** Tier qualification thresholds, custom VIP bonus allocations, and retention management.

4. Gameplay, Bet Settlement & Technical Errors

Technical glitches or disputed sports results create immediate frustration. Real-time logging visibility allows agents to resolve disputes objectively.

Detailed Operational Sub-Categories & Examples

A. Sportsbook Bet Settlement Disputes

- **Player Quote:** *"My bet on the football match was settled as a loss, but the team won in extra time! Fix this!"*
- **Player Quote:** *"Why was my player prop bet marked as 'Void' with odds of 1.00?"*
- **Player Quote:** *"Why was Cash Out turned off for my parlay ticket right before the final whistle?"*
- **Underlying Context:** Official sports data feed rules (e.g., Regular Time vs. Overtime settlement criteria), postponed matches, or dynamic Cash Out suspension during live VAR reviews.

B. Casino & Live Dealer Interruptions

- **Player Quote:** *"The slot machine froze right when 3 Scatter symbols hit for the Bonus Round! Did I lose my bonus feature?"*
- **Player Quote:** *"My internet dropped while I was at the Live Blackjack table. Did the dealer auto-stand my hand?"*
- **Player Quote:** *"The game kicked me out and said 'Session Expired', but my bet was already deducted."*
- **Underlying Context:** Remote Game Server (RGS) round state recovery, client-side disconnection protocols, and RNG state persistence.

C. Geolocation & Mobile App Errors

- **Player Quote:** *"I'm sitting on my couch in New Jersey, but your app says 'Location Verification Failed: Player outside licensed zone'."*
- **Player Quote:** *"Why am I getting error code **GE0-504** whenever I try to place a bet on Wi-Fi?"*
- **Underlying Context:** Wi-Fi triangulation failures, IP address masking/VPN detection, or border proximity geofencing barriers.

5. Responsible Gaming (RG) & Player Safety

Responsible Gaming queries demand immediate, non-negotiable compliance actions. Safety protocols supersede all business retention objectives.

Detailed Operational Sub-Categories & Examples

A. Self-Imposed Account Limits

- **Player Quote:** *"I want to set a weekly deposit limit of \$200 starting right now."*
- **Player Quote:** *"Can I set a loss limit so I don't lose more than \$50 in a single day?"*
- **Player Quote:** *"I set a 24-hour cool-off period, but I want to remove it early. Can you unlock my account?"*
- **Underlying Context:** Instant limit enforcement and mandatory cooling-off period rules (e.g., statutory 24-hour to 7-day waiting periods required before raising or removing limits).

B. Self-Exclusion & Account Closure

- **Player Quote:** *"I want to close my account for 6 months because I need a break from gambling."*
- **Player Quote:** *"Please permanently ban my account and remove me from all marketing emails."*
- **Player Quote:** *"How do I register with the national self-exclusion database (e.g., GAMSTOP / Spelpaus)?"*
- **Underlying Context:** Multi-brand exclusion enforcement, immediate suppression of marketing feeds, and regulatory compliance audit trails.

C. Problem Gambling Risk & Distress Markers

- **Player Quote:** *"I just lost my rent money tonight, I need to win it back or I'm in big trouble."*
- **Player Quote:** *"Your games are rigged, I've lost every single deposit this week and I can't stop playing."*
- **Underlying Context:** Duty-of-care emergency protocols requiring immediate automated account locking, human compliance officer escalation, and providing confidential support helplines.

6. Account Access & Security Management

Credential and access management forms the foundation of player retention and account security.

Detailed Operational Sub-Categories & Examples

A. Authentication & Credential Recovery

- **Player Quote:** *"I forgot my password and I'm not getting the reset link in my email."*
- **Player Quote:** *"I got a new phone and lost access to my Authenticator app for 2FA. How can I log in?"*
- **Player Quote:** *"My account was locked after typing my password wrong three times."*

- **Underlying Context:** Automated identity challenge protocols, OTP distribution via SMS/email, and brute-force prevention locks.

B. Security Alerts & Unauthorized Access

- **Player Quote:** *"I just got an email saying someone logged into my account from another country. Was I hacked?"*
- **Player Quote:** *"There's a withdrawal request on my account that I didn't authorize!"*
- **Underlying Context:** Compromised credential checks, session termination, IP address anomaly detection, and fraud team escalations.

C. Multi-Account & Household Restrictions

- **Player Quote:** *"My roommate and I both have accounts on your site. Why was my bonus canceled for 'Duplicate IP'?"*
- **Player Quote:** *"Can I open a second account using my alternative email address?"*
- **Underlying Context:** Platform terms forbidding multiple accounts per individual or restricting promotional claims to one per IP address/household.

Summary Matrix of Operational Categories

Category	Primary Player Emotion	Priority Level	Key Target System	Primary Escalation Trigger
1. Financial & Transactions	High Frustration / Urgency	High	PAM / PSP Gateways	Chargebacks, balance discrepancies
2. Account Verification (KYC)	Impatience / Friction	Medium-High	KYC Verification Engines	Document rejection loops, SoF limits
3. Bonuses & VIP	Confusion / Curiosity	Medium	Promotion Engine / CRM	Uncredited bonus claims, VIP inquiries
4. Gameplay & Tech	Anger / Confusion	Medium	Sportsbook Feed / RGS Logs	Mid-game crashes, disputed settlement
5. Responsible Gaming (RG)	Vulnerability / Distress	CRITICAL	RG / Compliance Service	Harm detection signals, self-exclusion
